

working within, llc

investing in the success of Black social enterprise leaders

Working Within provides personal partnership and deep business acumen to Black social enterprise leaders looking to scale their impact and create sustainability in their operations.

We provide The Working Within **Amplifying Black Social Enterprises Program** along with individual workshop series to help Black visionaries focus their talents, lead with power, and execute.

We started as a podcast, but then we kept receiving requests to speak, and then we kept receiving requests to advise. We love what we do, thank you for checking us out!

we help visionaries execute their big ideas through...

Amplifying Black Social Enterprises

This program is highly tailored to our clients, focusing on three central phases: Investigate - Strategize - Implement to address our clients' highest priorities.

We increase the sustainability of Black social enterprises through partnering with management teams, creating and driving strategic shifts, building organizational effectiveness and capacity, and reinforcing the social capital of our clients.

Founder & CEO

speaking & workshops

Here at Working Within, we provide a variety of virtual and in-person professional development workshops and speaking engagements tailored to Black students (of school and life), early to mid career professionals, and budding entrepreneurs.

Individual workshop series focus on the themes of leadership, entrepreneurship, communications, and personal power.
